

# WHY A BABY NEBULIZER? . . .

Because babies and young children don't stay in one position. The PARI BABY™

Reusable Nebulizer Set and Mask

Conversion Kit were designed

specifically for the low

inspiratory flow rate

and small tidal

volumes of babies

and young children.

For the first time

there is a

Reusable

Nebulizer

system that

is not

position

dependent,

allowing for better

compliance and more

efficient aerosol delivery.

The three sizes of soft silicone

masks are comfortable for small

children up to age 3.

Innovative . . . PARI BABY™ products.
